

Duquesne University Barnes & Noble

Duquesne University Barnes & Noble

Jendoco Construction Corporation was selected to complete the Barnes & Noble Store located within the Duquesne University Power Center. Work included the lighting installation, coordination of fixturing by an independent contractor, installation of ceilings, and all interior finishes; flooring, painting, and wood trim. Jendoco was also responsible for integrating the coordination and installation of the HVAC systems, plumbing, and electrical systems. Also included was the coordination and installation of the snack bar and food preparation area.

Jendoco was instrumental in assisting Barnes and Noble management with obtaining the City of Pittsburgh Building and Occupancy Permits which resulted in a smooth transition for occupancy. The involvement of Jendoco allowed the store to open two months ahead of schedule.
