

Geneva College - Memorial Hall

Jendoco Construction Corporation was chosen as the Construction Manager to provide pre-construction services and serve as the General Contractor for Memorial Hall at Geneva College.

Memorial Hall is a four-story wood frame building constructed in the 1920's.

Jendoco Construction Corporation provided the removal of the interior infrastructure and completely renovated the building during a three month period between May 1998 and August 1998.

The facility included all new fire protection, HVAC, data cabling, power distribution and interior architectural upgrades. The showers and restrooms required replacement of the structural steel due to moisture deterioration.
