

St. Barbara Catholic Church Penn Township, Pennsylvania

Jendoco Construction Corporation provided pre-construction and construction services for the multi faceted expansion of the rectory and provided 12 additional classrooms to the existing facility.

This work was performed while maintaining existing operations in the classroom wing.

The church expansion reconfigured the linear shape to a cruciform footprint thus maintaining a major portion of both existing ends of the church.

This project had a 12 month schedule with a completion date of Christmas Eve.

Although project started three months late, through the focused efforts of the team, the completion date was achieved.
